

## **TIE COMMITTEE MEETING**

**February 11, 2009**

### **PI REPORT**

#### **Construction Update**

##### Area 1 - 3600 West to 1300 West

- Work is continuing at the Utah and Salt Lake Canals at approximately 2200 West.
- Work is continuing near the Utah Lake Distribution Canal at approximately 3200 West.

##### Area 2 - 1300 West to Lone Peak Parkway

- Railroad work expected to start in early summer.
- Crews will continue to stock pile soil at Willow Creek, which will be used to bring the future road and bridge to the appropriate height.
- Work will start at the Jordan River crossing.

##### Area 3 - Long Peak Parkway to State Street (Including I-15)

- Crews will continue working along future on/off ramps. Work will include temporary shoulder closures.
- Pile driving on Sunday, Feb. 22, which will have minimal impacts to traffic.

#### **January TIE Committee Meeting**

##### **Comments:**

- Trees should be chosen so they are 30 feet tall at maturity and fast growing.
- Mural themes: transportation, canoes, wildlife and fishing were suggested for the Jordan River and Horses for South Jordan.
- Wanted to see if there are alternatives to eliminating landscaping in exchange for Texture C.
- Embedded pea-gravel does not complement the detail given to the other structures. Would like to leave out murals on soundwalls and put in a separating pillar similar to those on the bridge structures about every fifth placement. Would like alternative drawings and discussion on budget comparisons.

## **Meet the Contractor**

Attendees: 210

### Information Covered:

- Construction Schedule
- A&W
- Project Design
- TIE Committee
- Right of Way
- 10400 South Project
